

Flat Paper

What You'll Need...

- A stack of newspaper
- An empty, clear space

Important!

Don't use any glossy advertisements or half sheets of newspaper.

The Process

Open a full sheet of newspaper and lay it down on the table. Repeat this and continue to lay full sheets of newspaper neatly on top of one another.

After you have a substantial stack of newspaper, align the sheets and fold them in half.

Set the stack aside, and repeat the process until you no longer have newspaper left or you have as many stacks as you were told to make.

Put the stack of flat paper in the newspaper closet in the cattery.

Clean Up

Throw away the glossy advertisements and the half sheets of newspaper.
