

Spot Cleaning

What you'll need...

- Poop bag
- Disinfectant can
- Scrub brush
- Watering can
- Squeegee

Steps

1. Call the dog(s) over to the other side of the run and lower the guillotine so they are not on the side you will enter.
2. Remove any items from the run, such as beds and water dishes.
3. If necessary, pick poop up with the poop bag. If the run just has pee in it, skip this step.
4. Pour disinfectant on the floor of the run.
5. Scrub the floor using the brush.
6. Rinse the floor of the run by pouring water on it.
7. Using the squeegee, push the water and disinfectant into the drain in the middle of the run.
8. Return all items to their place in the run.
9. Close the kennel door and lift the guillotine.

Step 10: Clean up

- Throw the poop bag away.
- Return the squeegee and scrub brush to their places.
- If needed, fill up the watering can with cold water. Put the watering can back with the others.
- Return the disinfectant can.
