

Lethal Lilies

Even small ingestions - including pollen or water from the vase may result in severe, acute kidney failure.

Spring is finally here, but did you know certain flowers are lethal to your pets? Before you bring those beautiful blooms inside, be sure your four-legged family members are safe!

Easter lilies, Stargazer lilies and Asiatic lilies seem to be the most hazardous.

If you suspect your cat may have ingested any part of a lily, or any other potentially toxic substance

- Seek Veterinary Care Immediately
