

PET ROCK

Care Guide

Caring for a pet rock is great practice for when
you have a pet cat, dog, or small animal!
Here are some things you will have to do to care for a pet.

1. Name your pet rock.
2. Feeding: Your pet rock lives off of love and kindness so be sure to always be helpful, cheerful and friendly.
3. Exercise: Your pet rock loves to go out with you on walks and also play "catch" with a friend, as long as you are very gentle. Swimming is off limits for pet rocks as they are known to be poor swimmers.
4. Housing: Your pet rock will need a place to keep safe, warm, and dry when they are not out adventuring with you. Create a shelter with a bed for your pet.
5. Health: Give your pet a medical checkup. Don't forget to check their teeth!
6. Training: Pet rocks are easy to train. Train your pet rock to "sit", "stay," and "play dead."
7. Socialization (making friends): Introduce your pet rock to other people and other pet rocks.
8. Care: Keep your pet rock clean by giving them a bath or shower.

We'd love to see pictures of your pet rock!
